Paper Award *

CHI '23 Best Paper Award **

SUMMARY

Game developer specialising in cooperative and asymmetric play. Experienced in Unity and Godot with published research on game design at top-tier conferences. Skilled in bridging technical development and design to create engaging multiplayer experiences.

GAME DEVELOPMENT EXPERIENCE

Koala Boutique - Unity + Firebase

- Multiplayer Game w/ Asynchronous and Asymmetric Roles
- PC Roguelike & Mobile Manager
- Designed and developed gameplay systems, including asynchronous multiplayer integration.
- Concept and design informed by academic research on family play constraints.

Game Jam Projects (2017-2020) – Unity. Rapid prototyping under time constraints, often in small teams.

Personal Side Projects in Godot

RESEARCH HIGHLIGHTS

A Living Framework for Understanding Cooperative Games * CHI '24
(Core A*)

- Systematisation of cooperative game design knowledge; built interactive framework tool.

Promoting Family Play through Asymmetric Game Design * CSCW '24
(Core A)

- Developed, designed, and tested Koala Boutique for diverse family play scenarios.

"My Zelda Cane": Strategies Used by Blind Players to Play Visual-Centric Digital Games ** CHI '23
(Core A*)

- Analysis of accessibility strategies in gameplay for blind expert players.

"LEMON" FCT Project (PTDC/PSI-GER/3281/2020) 2021

- Developed Android app for handwriting analysis study; integrated Firebase.

EDUCATION

PhD in Informatics (interrupted) 2022-2025
LASIGE, Faculty of Sciences - University of Lisbon

- Research on cooperative game design, fully funded by FCT Scholarship (ref. 2022.12448.BD).

Integrated Masters in Computer Science 2015-2021
Nova School of Science and Technology

- Thesis (Grade: 18) at LASIGE,

OTHER EXPERIENCE

- Annual Unity and Godot workshops for Game Development class at University of Lisbon
- President of Game Development group in NOVA SST
- 5 years in acting groups with annual plays (led by Francis Seleck)
- Self-hosting and server administration experience
